

Rakaez Al Basra

General Contracting Company

Company Profile

Rakaez Al Basra General Contracting Company LLC is one of the leading national companies specializing in the execution of engineering and construction projects of various types. The company is committed to delivering integrated solutions in accordance with the highest technical and engineering standards, relying on qualified professionals and extensive experience in construction, .development, and infrastructure sectors

The company's activities encompass general contracting services, including the construction and demolition of residential, commercial, and industrial buildings, as well as the execution of road and bridge projects of all types, contributing to infrastructure development and the enhancement of transportation networks .and urban growth

The company also provides land, sea, and air transportation services to support projects and deliver comprehensive logistics solutions for the movement of equipment, materials, and machinery both within Iraq and internationally. In addition, it is actively engaged in the construction and development of railway projects in accordance with modern engineering specifications, as well as the development, rehabilitation, and maintenance of airports and their associated .facilities

Rakaez Al Basra General Contracting Company undertakes the construction of dams, reservoirs, irrigation, and drainage projects that contribute to effective water resource management and agricultural development. The company also offers surveying and geomatics services, including topographic surveys, mapping, and engineering measurements using advanced technologies and .specialized equipment

As part of its commitment to supporting the maritime sector, the company executes port development projects, including the rehabilitation of berths and port facilities. It also undertakes water supply, sewage, and related infrastructure projects to ensure the provision of essential services for .residential and industrial communities

The company possesses extensive expertise in electrical and mechanical works, including equipment installation, pumping stations, power generation projects, and various energy systems. Its capabilities further extend to air conditioning, refrigeration, and heating systems for residential, commercial, and industrial facilities.

In addition, the company provides electrical and sanitary installations of all types, the construction of towers and steel structures, and the execution of specialized engineering projects, while maintaining full compliance with quality standards, occupational health and safety requirements, and project delivery schedules.

Rakaez Al Basra General Contracting Company aspires to be a trusted partner in the implementation of strategic and developmental projects by providing integrated engineering solutions that combine quality, efficiency, and innovation. Through its commitment to excellence, the company seeks to meet the needs of both public and private sectors while contributing to Iraq's ongoing development and reconstruction efforts.

Company Mission and Objectives

Rakaez Al Basra General Contracting Company LLC is one of Iraq's leading national companies in the field of engineering projects and general contracting. The company is committed to delivering integrated services based on quality, precision, and strict adherence to recognized technical and engineering standards.

Our Mission

The company's mission is to play an active role in supporting Iraq's reconstruction and development efforts through the efficient execution of infrastructure, construction, and public service projects. By delivering high-quality solutions that meet the highest standards, the company strives to achieve customer satisfaction and fulfill the requirements of clients and stakeholders alike.

Our Objectives

The company aims to strengthen its position within the contracting sector by undertaking a diverse range of projects in the fields of construction, roads, bridges, telecommunications, and technical services. It is also committed to continuously enhancing its engineering and technical capabilities, adopting the latest technologies and methodologies in project execution, and establishing strategic partnerships that contribute to the expansion of its operations and services.

Furthermore, the company seeks to improve operational efficiency, maintain the highest standards of quality, health, safety, and environmental compliance, and invest in the development of its human resources to ensure sustainable performance and excellence across all projects.

Through its mission and objectives, Rakaez Al Basra General Contracting Company reaffirms its commitment to being a key contributor to Iraq's reconstruction and development journey, while continuously supporting infrastructure advancement and serving the broader community through innovative and reliable engineering solutions.

Company Services

General Contracting

Rakaez Al Basra General Contracting Company LLC is one of Iraq's leading companies in the construction and contracting sector. Operating primarily in Basra Governorate and throughout Iraq, the company relies on specialized technical and engineering expertise, as well as comprehensive execution capabilities, enabling it to successfully undertake projects of various sizes and disciplines.

The company provides a wide range of general contracting and construction services, including the construction and demolition of residential, commercial, and industrial buildings, as well as the execution of road, bridge, and infrastructure projects. In addition, it offers land, sea, and air transportation services to support project operations and deliver integrated logistics solutions.

The company also specializes in the construction and development of railway systems, airport development and maintenance, and the execution of dams, reservoirs, irrigation, and drainage projects. Furthermore, it provides surveying and geomatics services, including topographic surveys and engineering design preparation using advanced technologies and modern equipment.

Its scope of work extends to the development of ports and marine facilities, water supply and sewage projects, electrical and mechanical works, the installation of industrial equipment and pumping stations, as well as the construction of power generation plants and various energy systems.

In the field of specialized technical services, the company undertakes air conditioning, refrigeration, and heating projects, electrical and sanitary installations, and the construction of towers and steel structures, while maintaining the highest standards of quality, safety, and operational efficiency.

Through its comprehensive capabilities, Rakaez Al Basra General Contracting Company seeks to play an active role in reconstruction and development projects across Basra and all Iraqi governorates by delivering integrated engineering solutions and distinguished services that meet the needs of both public and private sectors while supporting the country's urban and economic growth.

Building Construction and Demolition Works

Rakaez Al Basra General Contracting Company LLC possesses extensive expertise in the construction of residential, commercial, and industrial buildings, providing comprehensive construction solutions that begin with feasibility studies and engineering designs and extend through project execution and final handover, in accordance with the highest standards of quality and efficiency.

The company undertakes a wide range of construction projects, including residential houses, housing complexes, multi-story buildings, administrative and commercial facilities, warehouses, and industrial structures. Particular emphasis is placed on the use of materials and equipment that comply with approved technical specifications, ensuring durability, safety, and long-term sustainability.

In addition, the company provides professional demolition and site clearance services for old, damaged, or obsolete buildings and structures. These services are carried out using modern machinery and specialized equipment while adhering to strict occupational health and safety standards and ensuring the protection of surrounding properties and the environment.

Demolition activities include the removal, handling, and transportation of debris and waste materials to designated disposal sites, preparing locations for redevelopment, reconstruction, or the implementation of new projects.

Throughout all construction and demolition operations, Rakaez Al Basra General Contracting Company remains committed to delivering projects within established timelines under the supervision of qualified engineering and technical teams. This commitment enables the company to meet client expectations while contributing to reconstruction efforts and urban development in Basra Governorate and across Iraq.

Road and Bridge Construction Works

Rakaez Al Basra General Contracting Company LLC is specialized in the execution of road and bridge projects of various types, utilizing modern engineering methodologies and internationally recognized technical standards. Through its expertise and capabilities, the company contributes to the development of infrastructure and the enhancement of transportation networks throughout Basra Governorate and across Iraq

The company's services include the construction of primary and secondary roads, highways, rural roads, and industrial access roads. Project implementation covers all stages, beginning with surveying, engineering design, soil preparation, and foundation treatment, followed by asphalt or concrete paving works, as well as the construction of sidewalks, medians, stormwater drainage systems, traffic signage, and road safety installations

The company also possesses the expertise and resources required to execute bridges, overpasses, and concrete and steel culverts. Its capabilities encompass foundation works, piling systems, bridge piers, columns, and reinforced concrete and structural steel superstructures, all carried out in compliance with the highest standards of quality, durability, and structural safety

To ensure the successful delivery of projects, Rakaez Al Basra General Contracting Company employs modern construction equipment and highly qualified engineering and technical personnel. This enables the company to complete projects efficiently and within specified timeframes, contributing to improved traffic flow, supporting reconstruction and development initiatives, and meeting the demands of Iraq's economic and urban growth

Land, Sea, and Air Transportation Services

Rakaez Al Basra General Contracting Company LLC provides comprehensive land, sea, and air transportation services, leveraging the strategic location of Basra Governorate and its advanced logistical capabilities to deliver safe, efficient, and reliable transportation solutions that meet the requirements of both public and private sector projects of all sizes

The company's land transportation services include the movement of construction materials, equipment, heavy machinery, and general cargo through a modern transportation network. All operations are carried out in accordance with the highest standards of safety and quality, ensuring the timely and secure delivery of shipments to their destinations

In the field of maritime transportation, the company offers cargo and equipment shipping services through Iraqi and regional ports. Its services include the management of loading, unloading, cargo handling, freight coordination, and customs clearance procedures, ensuring smooth cargo movement and supporting industrial, construction, and commercial projects

For air transportation, the company provides fast and dependable solutions for the shipment of high-priority cargo, equipment, and materials. These services are coordinated with relevant authorities and accredited carriers to ensure rapid delivery while minimizing operational time and costs

Through its integrated logistics capabilities, Rakaez Al Basra General Contracting Company is committed to delivering transportation and supply chain solutions that combine efficiency, flexibility, and reliability, thereby supporting reconstruction and development projects and meeting the diverse needs of clients throughout Basra Governorate and across Iraq

Railway Construction, Development, and Maintenance Works

Rakaez Al Basra General Contracting Company LLC possesses specialized technical expertise and capabilities in the construction, development, and maintenance of railway projects, recognizing their vital role as a key component of infrastructure that supports transportation networks and .contributes to economic and commercial development

The company undertakes all phases of railway projects, beginning with engineering surveys, technical studies, and the preparation of designs and construction plans. Its services extend through earthworks, excavation, embankment construction, foundation preparation, and track bed development, culminating in the installation of railway tracks, sleepers, and associated infrastructure in accordance with approved technical specifications .and industry standards

In addition, the company provides railway modernization and rehabilitation services by upgrading existing infrastructure, improving operational efficiency, and increasing network capacity. It also carries out routine and emergency maintenance works to ensure service continuity, operational .reliability, and railway safety

The company's capabilities further include the construction and rehabilitation of railway stations and supporting facilities, as well as the implementation of signaling, communications, and control systems that align with the latest .technological advancements in the railway transportation sector

Rakaez Al Basra General Contracting Company is committed to applying the highest standards of quality, safety, and engineering excellence in all railway projects. Supported by qualified engineering and technical teams and advanced equipment, the company contributes to national development initiatives and the expansion of modern transportation networks throughout .Basra Governorate and across Iraq

Airport Development and Maintenance Works

Rakaez Al Basra General Contracting Company LLC provides specialized services in the field of airport development and maintenance through the execution of construction and technical projects that enhance airport efficiency and strengthen their capacity to meet the demands of modern air transportation.

The company's services include the construction, rehabilitation, and upgrading of airport runways, taxiways, and aircraft parking aprons, as well as expansion and development works for administrative buildings, passenger terminals, and various airport support facilities.

In addition, the company undertakes the implementation of airport-related infrastructure projects, including internal road networks, drainage systems, and supporting utility services that are essential for efficient airport operations.

The company also performs routine maintenance and comprehensive rehabilitation of airport facilities and aviation infrastructure to ensure continuous and reliable operation. Its capabilities extend to electrical and mechanical works, airfield lighting systems, navigational lighting installations, and other technical systems required to support safe and efficient air traffic operations.

Rakaez Al Basra General Contracting Company is committed to adhering to approved engineering specifications and internationally recognized aviation safety and quality standards. Supported by specialized personnel and modern equipment, the company delivers projects in accordance with best engineering practices, contributing to the advancement of airport infrastructure throughout Basra Governorate and across Iraq.

Dams, Reservoirs, Irrigation, and Drainage Projects

Rakaez Al Basra General Contracting Company LLC undertakes the construction of dams, water reservoirs, irrigation systems, and drainage networks in accordance with the latest engineering and technical standards. The company recognizes the critical importance of effective water resource management and its vital role in supporting agricultural and economic development while promoting long-term water sustainability

The company's services include the construction of dams and water reservoirs of various types and capacities, together with all associated earthworks, concrete works, and mechanical installations. These projects encompass control gates, water discharge structures, and related facilities, all executed in compliance with the highest standards of safety, reliability, and operational efficiency

The company also specializes in the implementation of modern irrigation projects and water transmission and distribution networks. Its capabilities include the construction of primary and secondary canals, pumping stations, and supporting hydraulic structures, contributing to improved water resource utilization and enhanced efficiency in agricultural water management

In the field of drainage and water management, the company undertakes the construction of open and closed drainage systems, lifting stations, and water discharge facilities. These projects are designed to address high groundwater levels, reduce soil salinity, and improve agricultural land productivity

Supported by qualified engineering and technical teams and advanced construction equipment, Rakaez Al Basra General Contracting Company delivers dams, reservoirs, irrigation, and drainage projects with a high level of efficiency and professionalism. The company remains fully committed to approved technical and environmental standards, contributing to water security and sustainable development initiatives throughout Basra Governorate and across Iraq

Surveying Engineering Services

Rakaez Al Basra General Contracting Company LLC provides comprehensive surveying engineering services, recognizing surveying as one of the fundamental pillars for the successful execution of engineering, construction, and infrastructure projects. The company utilizes advanced surveying equipment and modern technologies to ensure accuracy, efficiency, and reliability throughout all project stages.

The company's services include topographic and land surveying, site positioning and coordinate determination, the preparation of topographical maps and survey plans, as well as engineering setting-out and construction layout works. These services ensure that projects are executed in full compliance with approved designs and technical specifications.

The company also undertakes surveying works for roads, bridges, railways, airports, dams, water supply networks, and sewage systems. In addition, it provides property boundary determination, quantity and area calculations, and the preparation of technical reports required for various types of projects.

To achieve the highest levels of precision, the company employs advanced measurement instruments, total station systems, and modern digital surveying technologies. These tools enable the collection of highly accurate data, contributing to faster project delivery and minimizing errors during execution.

Through the expertise of qualified engineers and professional surveyors, Rakaez Al Basra General Contracting Company is committed to delivering high-quality surveying services that support the successful implementation of construction and development projects throughout Basra Governorate and across Iraq, ensuring the highest standards of accuracy, efficiency, and reliability in engineering works.

Port Development Works

Rakaez Al Basra General Contracting Company LLC is qualified to undertake port development and rehabilitation projects, contributing to the enhancement of maritime transportation capabilities and supporting commercial and economic activities throughout Basra Governorate and across Iraq.

The company's services include the construction and development of port berths, navigation basins, storage yards, and administrative and service buildings. It also performs dredging and deepening works, as well as the preparation and improvement of navigation channels to facilitate vessel movement and enhance operational efficiency within port facilities.

In addition, the company executes port-related infrastructure projects, including road and railway networks, water supply and sewage systems, electrical installations, and telecommunications networks. Its capabilities further extend to the installation of cargo handling, loading, and unloading equipment in accordance with the latest technical standards and industry requirements.

The company also provides maintenance, rehabilitation, and expansion services for existing port facilities, with the objective of increasing capacity, improving operational performance, and enhancing safety and security standards.

Supported by experienced engineering and technical teams with extensive expertise in marine and port projects, Rakaez Al Basra General Contracting Company is committed to delivering high-quality solutions in compliance with the highest standards of quality, safety, and project execution. Through these efforts, the company contributes to the development of Iraq's port sector and strengthens the country's position as a strategic hub for maritime transportation and trade in the region.

Water Supply and Sewerage Works

Rakaez Al Basra General Contracting Company LLC possesses extensive experience in the execution of water supply and sewerage projects of all types. These projects represent a vital component of infrastructure development, supporting urban growth and enhancing the .quality of public services

The company's services include the construction and installation of potable water transmission and distribution networks, as well as primary and secondary pipeline systems. It also undertakes the construction, rehabilitation, and upgrading of water reservoirs, pumping stations, and water treatment plants, ensuring the efficient and reliable .delivery of safe water in accordance with approved technical standards and specifications

In addition, the company executes sewerage and stormwater drainage projects, including excavation works, pipeline installation, manhole construction, lifting stations, and wastewater treatment facilities. The company also provides rehabilitation and upgrading services for existing networks to improve operational efficiency and accommodate urban .expansion

Its capabilities extend to the implementation of integrated infrastructure projects for residential complexes, new cities, industrial facilities, and commercial developments, while .ensuring compliance with public health, safety, and environmental requirements

By utilizing modern equipment, advanced machinery, and highly qualified engineering and technical personnel, Rakaez Al Basra General Contracting Company is committed to delivering water supply and sewerage projects with the highest levels of quality, precision, and efficiency. Through these efforts, the company contributes to the provision of sustainable public services and supports reconstruction and development initiatives .throughout Basra Governorate and across Iraq

Electrical and Mechanical Works

Rakaez Al Basra General Contracting Company LLC provides comprehensive electrical and mechanical services through the execution of industrial, service, and construction projects in accordance with the latest engineering and technical standards, ensuring the highest levels of efficiency, quality, and safety

The company's electrical services include the design, installation, operation, and maintenance of a wide range of electrical systems. These services encompass power distribution networks, substations, control and automation panels, indoor and outdoor lighting systems, grounding and protection systems, as well as underground and overhead cable installations for residential, commercial, and industrial projects

In the mechanical field, the company undertakes the implementation of pumping systems, mechanical installations, industrial piping networks, treatment facilities, and operational equipment. Its services also include the installation, commissioning, and maintenance of various machinery and equipment used in industrial and service facilities

The company possesses the expertise required to execute integrated electromechanical projects for buildings, factories, residential complexes, and government facilities, providing engineering solutions that enhance operational efficiency while reducing maintenance and energy costs

Rakaez Al Basra General Contracting Company is committed to applying the latest technologies and internationally recognized standards in the execution of electrical and mechanical works. Supported by specialized engineering and technical teams and advanced equipment, the company ensures the efficient delivery of projects within specified schedules while maintaining the highest standards of performance and reliability

Telecommunications and PBX Systems

Rakaez Al Basra General Contracting Company LLC provides integrated telecommunications and PBX system services, supported by advanced technical and engineering expertise that keeps pace with the rapid developments in this vital sector. The company executes telecommunications projects in accordance with the highest technical standards, ensuring .operational efficiency, service quality, and system reliability

The company's services include the supply, installation, and commissioning of modern PBX systems, whether digital or electronic, as well as the establishment of internal and external telecommunications networks for institutions, commercial facilities, and various projects. It also undertakes cable laying, network integration, and the maintenance of communication .systems to ensure stable performance and minimize service interruptions

To deliver reliable and future-ready solutions, the company utilizes the latest telecommunications technologies, including advanced networking systems and smart infrastructure solutions. These technologies contribute to enhancing communication efficiency and improving the quality of voice and .data transmission across different operational environments

Supported by highly qualified engineering and technical teams, Rakaez Al Basra General Contracting Company is capable of delivering telecommunications projects with precision, efficiency, and within demanding schedules. Its commitment to quality and technical excellence has established the company as a trusted contributor to the development of telecommunications infrastructure and the advancement of technology services that meet the evolving needs of modern organizations and future .growth requirements

Equipment Installation and Pumping Stations Works

Rakaez Al Basra General Contracting Company LLC provides specialized services in the installation of industrial equipment and pumping stations, supported by advanced engineering and technical expertise that enables the execution of projects of various sizes in accordance with the highest standards of quality and operational efficiency

The company's services include the supply, installation, and commissioning of mechanical and electromechanical equipment and machinery used in industrial and service projects. This also covers the execution of structural foundations and supporting works, as well as the required piping and utility installations to ensure safe and stable operation of equipment

In addition, the company undertakes the construction and equipping of pumping stations for water supply, sewerage, irrigation, drainage, and industrial applications. This includes the installation of main and auxiliary pumps, pipeline systems, control and automation systems, and associated electrical and mechanical equipment

The company also provides inspection, testing, commissioning, calibration, and preventive maintenance services to ensure optimal performance and continuous operation in compliance with approved technical standards, while strictly adhering to safety and quality requirements throughout all project phases

Supported by qualified engineering and technical teams and modern equipment, Rakaez Al Basra General Contracting Company delivers equipment installation and pumping station projects with high efficiency, contributing to infrastructure development and industrial and service sector growth across Basra Governorate and throughout Iraq

Power Generation Plant Projects

Rakaez Al Basra General Contracting Company LLC possesses the expertise, technical capabilities, and resources required to execute power generation plant projects of various types. Through its services, the company contributes to strengthening the energy sector, enhancing the stability of electrical power systems, and supporting the economic and urban development needs of Iraq

The company undertakes the construction, development, rehabilitation, and upgrading of power generation facilities, covering all project phases from civil and structural works to electrical and mechanical installations, culminating in the installation, testing, and commissioning of power plant units and equipment in accordance with the latest technical specifications and industry standards

Its capabilities include the installation of turbines, generators, power transformers, control and automation systems, as well as power transmission and interconnection networks and the supporting infrastructure required for the safe and efficient operation of power plants

In addition, the company provides maintenance, rehabilitation, and modernization services for existing power generation facilities with the objective of improving operational efficiency, increasing production capacity, and extending service life. These services are delivered in accordance with best engineering practices in the management and operation of energy projects

Supported by specialized engineering and technical teams and equipped with modern technologies and equipment, Rakaez Al Basra General Contracting Company is committed to executing power generation projects in compliance with the highest standards of quality, safety, and performance. The company delivers reliable and sustainable energy solutions that contribute to infrastructure development and support economic growth throughout Basra Governorate and across Iraq

HVAC (Heating, Ventilation, Air Conditioning, and Refrigeration) Works

Rakaez Al Basra General Contracting Company LLC provides comprehensive HVAC services for residential, commercial, industrial, and governmental facilities. The company delivers solutions in accordance with the latest technologies and approved engineering standards, ensuring comfortable, safe, and efficient indoor environments that meet diverse .climatic conditions and operational requirements

The company's services include the design, supply, installation, commissioning, and maintenance of central and split air-conditioning systems, industrial and commercial refrigeration systems, air handling units (AHUs), cooling towers, ventilation systems, air extraction systems, and air purification solutions. These services are designed to achieve optimal performance while maximizing energy efficiency and reducing .operating costs

In addition, the company undertakes the implementation of central and localized heating systems for various types of buildings and facilities, as well as the installation of piping networks and mechanical systems associated with heating, ventilation, air conditioning, and refrigeration applications. All works are executed in compliance with the highest .standards of quality, safety, and operational reliability

The company also provides inspection, testing, commissioning, preventive maintenance, and routine maintenance services to ensure continuous system performance, improve operational efficiency, and extend equipment service life. Customized technical solutions are developed to .meet the specific requirements of clients and project applications

Supported by specialized engineering and technical professionals with extensive practical experience in HVAC systems, Rakaez Al Basra General Contracting Company is committed to delivering projects in accordance with best engineering practices, ensuring maximum comfort, reliability, and operational efficiency across all sectors

Electrical and Plumbing Installations

Rakaez Al Basra General Contracting Company LLC provides comprehensive electrical and plumbing installation services for residential, commercial, industrial, and governmental projects. All works are executed in accordance with the latest approved engineering specifications and technical standards, ensuring operational efficiency, safety, and long-term reliability.

The company's electrical installation services include the implementation of internal and external electrical distribution networks, cable and wiring systems, power and lighting installations, distribution and control panels, grounding and protection systems, as well as the provision of the necessary infrastructure for modern electrical systems within buildings and facilities.

In the field of plumbing and sanitary installations, the company undertakes the construction and installation of potable water and hot water supply networks, sanitary drainage systems, stormwater drainage networks, and related piping systems. Its services also include the installation of sanitary fixtures, storage tanks, pumps, and associated equipment to ensure efficient operation and uninterrupted service.

The company is committed to utilizing materials and equipment that comply with recognized standards and specifications. All works are carried out under the supervision of qualified engineering and technical professionals, ensuring accuracy and quality throughout every project stage, from planning and design to testing and final commissioning.

Through its integrated approach, Rakaez Al Basra General Contracting Company delivers reliable electrical and plumbing solutions that meet the requirements of modern construction projects while ensuring the highest standards of safety, quality, and operational performance throughout Basra Governorate and across Iraq.

Towers and Steel Structures Works

Rakaez Al Basra General Contracting Company LLC provides specialized services in the construction of towers and various types of steel structures, relying on advanced engineering expertise and qualified technical teams to meet the requirements of industrial, service, and construction projects in accordance with the highest standards of quality and

.safety

The company's scope of work includes the design, fabrication, supply, and erection of steel structures and frameworks, as well as the construction of towers used for power transmission, telecommunications, lighting, and surveillance systems. It also undertakes the execution of steel structures for factories, warehouses, workshops, halls, and various .industrial and commercial facilities

In addition, the company performs cutting, welding, assembly, erection, treatment, and anti-corrosion protection works using modern equipment and advanced technologies, while strictly adhering to approved engineering specifications to ensure durability, .precision, and operational efficiency

The company also provides maintenance, rehabilitation, and strengthening services for existing steel structures, contributing to extended service life and improved performance .under various operational and environmental conditions

Rakaez Al Basra General Contracting Company is committed to executing towers and steel structure projects in compliance with the highest standards of occupational safety and quality, while adhering to project schedules. Through this approach, the company delivers integrated engineering solutions that support infrastructure, energy, telecommunications, .and industrial development across Basra Governorate and throughout Iraq

Catering and Food Service Operations

Rakaez Al Basra Company is one of the leading Iraqi companies specializing in catering and food service solutions. Operating primarily in Basra Governorate and throughout Iraq, the company relies on specialized managerial and operational expertise, as well as integrated service capabilities that enable it to provide high-quality catering and hospitality services to a wide range of clients and institutions.

The company provides comprehensive catering services for both public and private sector organizations, including government institutions, oil and gas companies, industrial and commercial enterprises, investment projects, residential complexes, hospitals, schools, universities, and various work sites. All services are delivered in accordance with the highest standards of quality, food safety, and hygiene.

The company also specializes in the management and operation of central kitchens, cafeterias, and institutional dining facilities, offering integrated catering and meal services for employees and workforce accommodations in both urban and remote locations. In addition, it provides meal preparation and catering services for meetings, conferences, official events, and special occasions.

Its services include the preparation of diverse and nutritionally balanced menus designed to meet varying dietary requirements, as well as food supply and provisioning services. The company manages storage, transportation, and distribution operations in accordance with modern food handling and safety practices to ensure the quality and freshness of food products from preparation to delivery.

Furthermore, the company is committed to implementing best practices in public health and food safety through the use of high-quality ingredients, skilled culinary and service personnel, and strict compliance with applicable health, safety, and environmental regulations.

Rakaez Al Basra Company strives to be a trusted partner in the catering and hospitality sector by delivering integrated solutions and exceptional services that meet the needs of both public and private sector clients. Through its commitment to excellence, the company contributes to supporting productive work environments and providing reliable, high-quality food services throughout Basra Governorate and across Iraq.
